

Your donation benefits cystic fibrosis research, education, advocacy, and support. This card's artwork was painted by Wanda Olson, mother to Michele Denise Olson (pictured), who passed away in 1999, at the age of 33, from cystic fibrosis complications. Wanda is in the midst of creating 65 rose paintings in Michele's memory. This is the 33rd painting in the series, featuring her beloved daughter's favorite - a Sterling Silver rose.

Research for Living ~ Partners for Life

Please Support Hope this Mother's Day and Beyond!

Each day, our loved ones with cystic fibrosis (CF) endure hours of respiratory therapy and take numerous medications in an effort to slow the progression of this challenging disease.

While new exciting medications are available, many cannot benefit from these therapies. We still have no cure for CF and the median age of death remains only 30.

We still need your help.

Please take a moment to reflect on the difference we can make together and consider supporting those impacted by CF. Your donation today will sustain CFRI's research, education, support, and advocacy programs for the CF community.

Thank you!
